QUALITY AND ENVIRONMENTAL POLICY

The company Aldama y Díez Ingenieros Asociados assumes Quality and respect for the Environment as the company's main concern.

The present Quality and Environment Policy (Q and E) is established, which has the support and impulse of the Sole Administrator and, in its executive part, is the direct responsibility of the highest Management.

A y D Ingenieros Asociados, through the Management, adopts the commitment to establish the means of management, procedures, good practices, etc. in terms of Q & E, which guarantee the good work and service in due time, price and form, as well as the preservation and respect for the environment and nature, during the exercise of its activities, in order to achieve a high level standard and with a commitment to seek continuous improvement of the Quality and Environmental Management System.

For all this, the Management demands that all the areas, departments and the entire hierarchical line of the company, as well as all its workers, assume in their daily tasks inherent to their jobs, the integration of the Quality and Environment exercise. That is to say, that everyone is responsible and collaborates in the search for the highest quality and the minimisation of environmental impacts in each process. In other words, in all phases, functions and operations carried out in the company.

As a guarantee of these principles, any employee of the company is empowered, by direct mandate of the Management, to report any process, activity or function that he/she considers inadequate in accordance with the standards of total quality and maximum respect for the environment.

The customer is a fundamental part of our C&MA system, and for this reason we attend to all their observations and requirements, implementing those that are beneficial to us in order to obtain a better result in C&MA.

This Policy is signed by the Management, and it is the order of the same that it is distributed and made known, exhibiting it in the places destined for this purpose, for the general knowledge of all those who make up the organisation.

Finally, it should be stated that this Policy is subject to periodic review, with the aim of trying to improve it and adapt it continuously to the chronological and circumstantial circumstances at any given time.
